Battery Maintainer + Battery Desulfator

2-BANK, 10-AMP ON-BOARD BATTERY CHARGER

Meet the all-new GEN5X2. Similar to our GENM2, only better. It's 27% smaller and delivers 43% more power. It's one of the best performing onboard marine battery chargers we have ever made. A two-bank onboard battery charger rated at 10-amps (5-amps per bank) for 12-volt batteries, including marine, boat, starter, and deepcycle batteries. Independently charge and control each battery bank with selectable charging modes - including 12V, 12V AGM, 12V Lithium, and 12V Repair Mode - for all types of lead-acid and lithium-ion batteries.

THE ALL NEW GENIUS. ON-BOARD SMART BATTERY CHARGERS.

deep-cycle batteries. Independently charge and control each battery bank with selectable charging modes - including 12V, 12V AGM, 12V Lithium, and 12V Repair Mode - for all types of lead-acid and lithium-ion batteries.

Our most powerful, efficient, and compact charger yet. A two-bank onboard battery

charger rated at 10-amps for 12-volt batteries, including marine, boat, starter, and

GEN genius 5x2

MORE POWER. SMALLER SIZE.

And its onboard microcomputer precisely controls the charging to minimize power

loss to create an incredibly compact form factor.

SMALLER

BETTER PERFORMANCE. Meet the all-new GEN5X2. Similar to our GENM2, only better. It's 27% smaller and delivers 43% more power. The GEN5X1 uses high-frequency switch-mode technology to efficiently convert A/C power into safe D/C power for battery charging.

MULTI-CHEMISTRY. MULTI-BATTERY TYPE. DO MORE WITH ONE CHARGER. A multi-functional design that allows you to charge in more ways. Effortlessly charge 12-volt lead-acid and lithium-ion batteries of multiple chemistries (Flooded, gel, maintenance-free and AGM batteries) and types (Starter, deep-cycle, marine, and more). A simplified mounting system allows for quick and easy installations in any direction - even up-side-down - with an integrated anti-vibration backing to isolate

shock, vibration, and noise.

COMPENSATION.

MORE PRECISE CHARGING IN ANY

The new integrated thermal sensor automatically monitors and adjusts the

charging cycle based on fluctuations of ambient temperature, limiting the

chance of under-charging or over-charging, providing a more accurate and fully

charged battery. Avoids under-charging in cold weather down to -4F and avoids

CLIMATE.

over-charging in hot weather up to 104F.

The GEN5X2 automatically detects sulfation/acid stratification. If any is found,

the GEN5X2 will automatically repair and reverse the damage done to the

battery, extending the usable life and increasing the performance.

damaged batteries and intuitively repair them. And actively monitor for long-term battery maintenance and extend battery life. This system allows for continuous operation without user intervention, and zero risk of overcharging your battery.
